**ESTRO
ASIA
2018**

7-9 December 2018
Singapore

COME AND JOIN US!

First of its kind, the ESTRO meets Asia congress will allow participants to:

- Attend 3 parallel tracks designed to address current issues in radiation oncology
- Get invaluable insight into new research trends
- Identify pertinent evolution of health technologies in radiotherapy
- Translate technological capabilities into clinical applications relevant to daily practice
- Connect and network with technology developers, stakeholders and peers
- Contribute to driving and directing the fast growing field of radiation oncology.

The congress will focus on four areas:

RADIOBIOLOGY:

Combined radiotherapy and chemotherapy, volume and dose-rate effect, protons

CLINICAL:

Head and neck, rectal, rare tumours, thorax, prostate, upper and lower GI

MEDICAL PHYSICS AND RTT:

IGRT and treatment verification, quality management and brachytherapy

ADVOCACY AND EDUCATION:

Joint interdisciplinary Forum

Collaborations for improving access and practice of radiation oncology: advocacy and education

In scientific
collaboration
